DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 9, 11, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Bradford (USPN 3,423,524).

Claims 1-5, 9, 11, and 15-17 are rejected for the same reasons as discussed in the previous Office Action, mailed on 3/17/2008 (see Response to Arguments below).

Response to Arguments

3. Applicant's arguments filed 6/16/2008 have been fully considered but they are not persuasive.

Applicant, on page 5 of the Response filed on 6/16/2008, argues that Bradford does not meet the limitation that there is no additional medium between the channel receiver and the disc drive since Bradford includes a timing disc (element 14). Examiner respectfully disagrees. Examiner notes that Applicant states that the medium is used to “record the signal outputted from the channel receiver” (paragraph 0005, first sentence in the instant specification). Examiner notes that the timing disc merely contains a set timing pattern so as to sync the recording with the incoming signal, and that there is no information being output from the channel receiver which is recorded on the timing disc. Examiner further notes that Applicant describes “an additional medium”

Art Unit: 2627

as a “personal computer or a high capacity memory such as a hard disk” (see second sentence of paragraph 0005 in instant specification). Examiner asserts that the timing disc is recognized by Applicant to be made of a transparent plate comprising a plurality of contrast producing lines, which cannot be considered a “personal computer” or “a high capacity memory”.

Furthermore, Examiner notes that the claimed limitation being argued by applicant states “without an additional medium between the channel receiver and the disc drive”. Examiner asserts that it can be clearly seen that the timing disc being disclosed by Bradford is clearly not between the recording medium and the video source (see Figure 3, elements 11, 14, 16, and 44 – note the electrical path between elements 44 and 16 wherein the signal is directly recorded onto the recording disc). Examiner notes that the timing disc is also part of the disc drive (see Bradford, Figure 3) and therefore cannot physically exist as a medium between the video source and the disc drive.

Examiner notes that Applicant applies the above arguments to independent claims 9 and 15. Examiner asserts that these arguments are not persuasive for the reasons discussed above.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2627

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
